DETAILED ACTION

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by **Wendt et al (6,686,888)**. **Wendt et al** discloses a vent structure (6) of injection molded material, mounted to a vehicle body (15) which includes an air vent, and has an antenna body (3) which is T-shaped (inversely, SEE Figures 1 & 2) and is integrated into the vent structure (6) and completely covered by the car frame bumper (15) (SEE column 5, lines 8-29); the frame is rectangular and has ribs (11) spanning two opposed sections (SEE Figure 2) wherein the antenna body spans both sides of the opposed sections.
